Dear Sirs,

I am writing to you today to request permission to metal detect on CRA vacant properties. I found out from the mayor that it is legal to detect on city property but cannot find out if CRA properties are considered city properties. I hope this request will clear this up or give me permission to detect on them.

I am one of four friends that have taken up the hobby during the pandemic and it has been very good for us to be able to get out and get some exercise and fresh air. We take care not to harm any property we are detecting and remove all trash that we dig up. We try to remove a plug of turf and replace it to show as little trace of having dug there. When there is no turf, we remove dirt onto a small piece of tarp so it can be easily replaced back into the hole and make as little mess as possible. Usually, the next rain after we have been there you can't find where we have dug.

We would be happy to sign a release of liability for when we are on your property. If you provide a phone number or email address we will send photos of what we find or meet with you to show you in person.

I appreciate your consideration in this matter,

Howard Boyd
